DETAILED ACTION

Election/Restriction

1. Claim 18 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, currently claim 1 is generic. Election was made **without** traverse in the reply filed on July 6th, 2005 and acknowledged in the reply to the first office action filed on March 26th, 2006. The Applicant's arguments to the addition of claims 3 and 12 to the restriction election are persuasive and the claims are to be examined on the merits.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the spring connected to the flag rod and the joint mechanism must be shown or the feature(s) canceled from claims 1 and 21. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-3, 5, 7, 9-16, 19, and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. Claims 1 and 21 contain subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. It is unclear how a spring is connected to the flag rods in order for it to return the flag rods to a designated position. The specification does not explain how the spring is connected from the flag rod to the joint mechanism to allow for the spring to move the flag rods to a designated position.

5. Claims 1-3, 5, 7, 9-16, 19, and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. Claims 1 and 21 contain subject matter which was not described in the specification in such a way as

to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The amendment to figure 5 shows a structure to the spring (136) that was not originally disclosed.

Response to Arguments

6. Applicant's arguments, see page 16 of applicants remarks, filed 3/28/06, with respect to 102 and 103 rejections have been fully considered and are persuasive. The 102 and 103 rejections have been withdrawn since none of them teach or suggest a spring to maintain the flag rods in a designated position within the housing. The applicant's arguments with respect to the drawing objection and 112 1st rejections are not persuasive. The amendment to the specification and the drawing do not provide enough description for one skilled in the art to be able to make the invention and further the amendment to the drawing adds new matter that was not disclosed originally since there are other ways that the spring could be attached.
